Dear Carl

In response to your inquiry ref the life expectancy of the CT1 SEALANT AND ADDHESIVE . The polymer ct1 after testing and free from external and internal contaminates, has a life span in excess of 25yrs. Ct1 compound consists of interlinking molecular chains hence enhancing its life span and preventing brake down.

When the product cures it cures to a flexible state and resists temperture fluxuation contracting and expanding with the changes in the elements

Yours Sincerely

Martin Mc Aleenan
