

Fixing Guide

L Bracket for Vertical Rail Mounting

Solar Limpets are warranted for 20 years, providing the installation is carried out by a Solar Limpet certificated installer, the installation instructions have been complied with in full and the roof was surveyed as suitable for PV installation.

Important Information

- The standard Solar Limpets system is designed for use with horizontal side-mounted rails.
- When rails must be vertically fixed (i.e. to suit landscape-orientated panels), the Limpet can be converted using the optional metal 'L' bracket as described below.

Components

1. 1x L Bracket for Vertical Rail Mounting *SL-LBVM001*
2. 1x L Bracket Coach Bolt *SL-LBCB001*
3. 1x L Bracket Nut *SL-LBN001*

L bracket attached on Solar Limpet for Tile application.
Note the angle of the adjustable bracket.

L bracket attached on Solar Limpet for Slate application.
Note the angle of the adjustable bracket.

Fixing Method

Below instructions show the adjustable bracket fitted for tiles.

1

The coach bolt can be fed through either the short or long side of the L Bracket.

2

Feed the coach bolt with the L bracket attached, through the adjustable bracket & screw on the nut to loosely secure.

3

Rotate the L bracket to the desired orientation,
and tighten the nut to secure.
DO NOT OVERTIGHTEN
